

Datasea Inc. Weekly Updates (Sep 11- Sep 18 ,2022)

Datasea participated in the roundtable discussion on the development of pilot rural revitalization villages

On September 9, 2022, Chairman Liu Fu of Shuhai Beijing and the team attended the roundtable discussion hosted by Fangshan District Agricultural Bureau regarding the development of pilot rural revitalization villages. The roundtable conducted in-depth exchanges and discussions on the opportunities related to "Beautiful Beijing" rural construction projects. The roundtable was also attended by representatives of think tanks and companies.

Fangshan District is located in suburban Beijing. Aiming to revitalize Beijing-Tianjin-Hebei Culture and Tourism in the post-epidemic era, traveling leisure in the countryside is the area to focus on. Fangshan launched a tourism development plan and introduced the concept of the digital economy. Taking the Internet as the starting point, it will continue with the sustainable development in the rural revitalization model.

Liu Fu, Chairman of Shuhai Beijing, presented the development strategy of Datasea in the 5G communication industry and introduced 5G messaging solutions. Shuhai's 5G digital industry platform can effectively enable and serve digital scenario applications in the vast rural areas around Beijing, including the Fangshan district.

Fangshan management and experts who attended the meeting recognized Datasea's 5G messaging products and capabilities. They believed that 5G messaging as a primary medium to enable digital village revitalization and development is highly compatible. Similarly, ten suburban areas around Beijing like Fangshan District are jointly serving Beijing, an international metropolis with a population of more than 30 million, on rural traveling leisure, rural digital upgrades and are in the process of revitalizing rural development.
